
agreement with the class
mean $p(c|\mathbf{x})$ of samples
guidance scale λ
trained network (CFG)
exact guided score
diversity
spread of the samples
guidance scale λ
trained network (CFG)
exact guided score
guided samples are not samples of the tilted density
$\lambda = 1$ samples
$\lambda = 4$ samples
$p(\mathbf{x}|c)^4 p(\mathbf{x})^{-3}$
distance from the centre $\|\mathbf{x}\|$
